MY LEGISLATIVE PLEDGE AS THE U.S. SENATOR:

**"TO SAVE AMERICA AND TO SAVE THE REPUBLIC"**

**NO TO CRIME!, NO TO RIOTING!, NO TO LOOTING!, NO TO INFLATION!,  
NO TO HIGHER TAXES!, NO TO UNCONTROLLED SPENDING/DEBT!,  
NO TO DE-FUNDING THE POLICE!, NO TO DELUSIONAL CRT!,  
NO TO SOCIAL ENGINEERING!, AND NO TO OPEN BORDER!**

**INSTEAD**

**LET'S HAVE THE AMERICA BE RULED BY LAW AND ORDER!  
LET'S HAVE THE AMERICA BE RULED BY THE COMMON SENSE!  
NOT BY THE DAMN NONSENSE!!**

## **ECONOMY**

### **More of Good Jobs and Much More of Well-paying Jobs**

In 40 years we lost 8 million jobs and 50 thousand factories. We must bring them back and/or create new ones.

It is the responsibility of the government to create suitable conditions in the private sector for decent jobs all deserve. We must create brand new Illinois Industrial Zones for Advanced Technologies.

### **Uncontrolled National Debt**

We must stop and/or reverse the spiral of the uncontrolled national and private debt, before a looming disaster strikes.

### **Taxes**

Middle class tax burden must be reduced. Eliminate corporate tax loopholes and/or create a flat low tax rate for all.

## **SOCIAL PROGRAMS**

### **Emphasis on Seniors, Veterans, and the Young Generation**

At all costs we must retain the social umbrella net and protect our most vulnerable and deserving groups in our society. We must seriously address handling of the 1.7 trillion dollars of the existing student debt and modify the future lending programs.

### **Environmental Protection**

No Jobs should be indiscriminately eliminated. 330 million will not save the entire world by the pollution/garbage created by 6 billion plus of others. Let them stop it first, and then lead the world in the clean-up!

## **FOREIGN AFFAIRS**

### **Immigration**

We need a total immigration policy overhaul based on our commonly shared values and needs. Immigration will thrive if we bring back 8 millions jobs and 50 thousand factories from overseas.

### **Military & World Power**

At all costs we must strive to maintain the military world power by reducing costs and by use of smart/soft technologies.

### **Declaration for Financial Independence**

It is a high time for the US to declare a strategy of financial independence.
